

# SPACE+

Wireless charging station

## PRODUCT OVERVIEW

Sensor ID's 'Space+' charging station is a metal structure with **5 or more wireless charging stations (18 x 10.5 cm)**, connected to a **central USB charger** with five USB 5V 2.4A ports.

The **charger's LCD display** shows the number of ports connected to the charger, providing effective control over device charging times.

**The charging station allows several devices to be charged simultaneously**, and the number of charging stations can be increased on request. Installation is extremely quick and easy and takes place via two hooks that are screwed into the wall on which the station is to be installed.
